Skills

- **React**(Hooks)
- **JavaScript**(ES6+/TypeScript)
- **Redux**
- **Node.js**
- **PostgreSQL**
- **HTML5**
- **CSS3**
- **Git version control**
- **npm**

Projects

SWAPIApp([live](#))([source](#))

- An interface to display all the data received from [SWAPI](#) API
- Tech stack: React, HTML5, CSS3
- Main challenges were implementing pagination and sequential fetching from the API

Inquisitor - Martyr: Ancient Relic Viewer([live](#))([source](#))

- An interface to display videogame item data based on user input with mined data fetched from a Google Sheet
- Tech stack: React, HTML5, CSS3
- Main challenge was learning to use third party libraries to create custom select inputs and to fetch data from a Google spreadsheet

Inquisitor - Martyr: Ancient Relic Enchants List([live](#))([source](#))

- An interface to display videogame item data based on user input with mined data fetched from a .txt file
- Tech stack: JavaScript, HTML5, CSS3
- Main challenge was using vanilla JavaScript only for DOM manipulation

Pizza landing([live](#))([source](#))

- A fully responsive landing page
- Tech stack: HTML5, CSS3
- Main challenge was making the website look good for all devices

Education

2016 - 2020

People's Friendship University of Russia(PFUR) - BSc in Linguistics
